GLOBUS NIGHT STAND — STAND-IN REDLINE v4

RFQ 20261109-164445-3593d492 · QTY 2 · 22" W x 20" D x 22" H · whitewashed maple · antique bronze legs · inches · scale 1:7.6

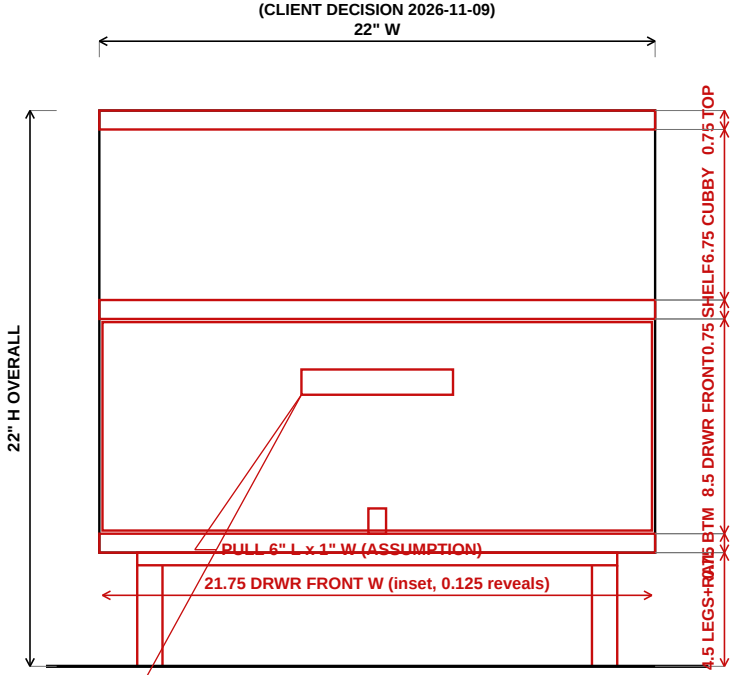
REV 4 — 2026-11-09 — lower front changed to one full-width drawer per client; sheet color-coded verified vs. assumption

BLACK = VERIFIED (Mark Jupiter product sheet) or CLIENT DECISION 2026-11-09

RED = ASSUMPTION — PENDING STUDIO CONFIRMATION (joinery, leg attachment, rail section, pull size, finish build-up, and every dimension derived from an assumption)

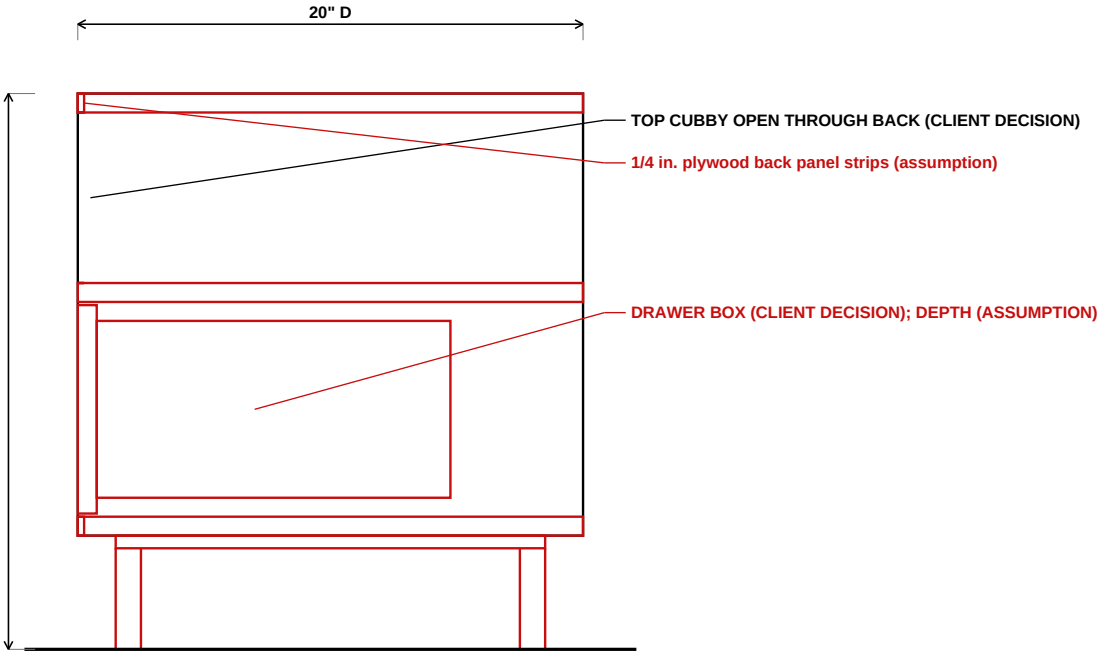
FRONT ELEVATION (1:7.6)

full-width drawer below shelf · cubby above · cubby OPEN THROUGH BACK (CLIENT DECISION 2026-11-09)



SIDE ELEVATION (1:7.6)

cubby open through back · drawer below (CLIENT DECISION 2026-11-09)



FABRICATED STRAP PULL, CENTERED (CLIENT DECISION; SIZE ASSUMPTION)

GENERAL NOTES

1. Dimensions in inches. Elevations are stand-in drafting from the published product sheet and client decisions — this is NOT a Mark Jupiter shop drawing and is not studio-approved.
2. LOWER FRONT (CLIENT DECISION 2026-11-09): one full-width pull drawer below a fixed shelf — NOT two doors. Door swing/hinge question is moot — no doors.
3. BACK (CLIENT DECISION 2026-11-09): top cubby open through the back; bottom zone is a drawer.
4. ASSUMPTION — DRAWER FRONT HEIGHT: case stack above legs = 22 − 4.5 = 17.5; 0.75 top + 6.75 cubby + 0.75 shelf + DRAWER + 0.75 bottom = 17.5 ⇒ drawer front = 8.5 H. Case height 17.5, all panel thicknesses 0.75, and cubby 6.75 carry over from v1 as assumptions. Stack sums exactly: 4.5 + 0.75 + 8.5 + 0.75 + 6.75 + 0.75 = 22.
5. ASSUMPTION — CASE JOINERY: studio convention unknown per client. Assumed rabbeted-and-dadoed case corners, glued, with interior cleats; shelf and bottom in stopped dados.
6. ASSUMPTION — LEG-TO-RAIL: bronze tube frame WELDED at the rail corners, then mechanically fastened to the case underside from inside. Rationale: welded corners are the standard and strongest detail for tube-frame bases; pinned joints add visible fasteners and racking risk at the rail. Rail section assumed 1.0 x 0.5 rectangular bronze tube to match the 1.0 dia legs. WELDED RAIL ESCALATES TO THE HUMAN-MODELING PACKAGE (outside v1 panel-and-case geometry).
7. ASSUMPTION — PULL: client confirmed FABRICATED bronze; size delegated to us. Assumed strap pull 6 L x 1 W x 0.125 thick, centered on the drawer front, mounted 2 below the front top edge. Length is ~3/4 of the 8.5 drawer-front height for front proportion; 1 width gives a full-hand grip.
8. ASSUMPTION — FINISH: whitewash stain + low-sheen conversion varnish — durable and preserves the published whitewashed look; sheen is unspecified by the product sheet. Bronze parts sealed antique, no lacquer — lets the antique bronze patina read naturally. Sample approval required before finishing.
9. BLACK VALUES: overall 22 x 20 x 22, whitewashed maple and antique bronze finish (SOURCE: Globus product sheet); drawer-under-shelf layout, cubby open through back, bottom-is-a-drawer, and fabricated pull (CLIENT DECISION 2026-11-09). All red values are assumptions pending studio confirmation.

PARTS SCHEDULE

Not a Mark Jupiter shop drawing. Not approved by the studio. Stand-in demo redline; every red item requires studio confirmation before fabrication.

GLOBUS NIGHT STAND — PARTS SCHEDULE

RFQ 20261109-164445-3593d492 · companion to stand-in redline v4 · inches · tagged dimensions in red are assumption-derived

——— **BLACK = part label (per redline color rule) · RED = assumption dimension pending studio confirmation**

DRAWER FRONT
- **WIDTH 21.75 IN**
- **HEIGHT 8.5 IN**
- **THICKNESS 0.75 IN**

CASE TOP
- **WIDTH 22 IN**
- **DEPTH 20 IN**
- **THK 0.75 IN**
